

MANGLE & WRINGER PURE LAUNDRY POWDER

Pure Laundry Powder is a safe, non-toxic and biodegradable alternative to harsher biological laundry powders. It doesn't contain detergents, dyes, fillers, perfumes, phosphates, optical brighteners, enzymes or petroleum based ingredients which could irritate sensitive skin. It is readily biodegradable and safe for septic tanks.

It is suitable for both white and colourfast fabrics and will leave all your laundry clean and soft.

Directions for use:

Laundry:

For normal soiling add 1 scoop (approx. 70g or a rounded tablespoon) to the dispenser drawer of your washing machine. Adjust for soft water areas and in particularly hard water areas add an extra 1/2 scoop. For heavy soiling we recommend adding a scoop of Natural Bleach to the dispenser drawer with the Pure Laundry Powder

For hand washing dissolve 1 scoop of powder in 5 litres of hot water and add cold water to your desired temperature.

Always wash according to the care labels in your garment.

For more information see our SOS soap or Soak guide

If you would like scent in your laundry add a few drops of your favourite essential oil to the powder in the dispenser drawer. Alternatively add the essential oil to the bag of Pure Laundry which will give you the scent every time you open the bag too!

STORE IN A DRY PLACE
